KA CHUN GARMENT CO.,LTD.

ABOUT US

Ka Chun Garment Co., Ltd. was founded in 1992 in Chencun—a small town located in the south of China, and has remained in this beautiful location. As we are committed to our roots, we are equally dedicated to our work developing, designing and manufacturing personal safety protective garments and materials. For more than 20 years, we have put continuous efforts and investments into our work, and have achieved great strides. Some of our products have been approved as patented products by the National Patent Office of China.

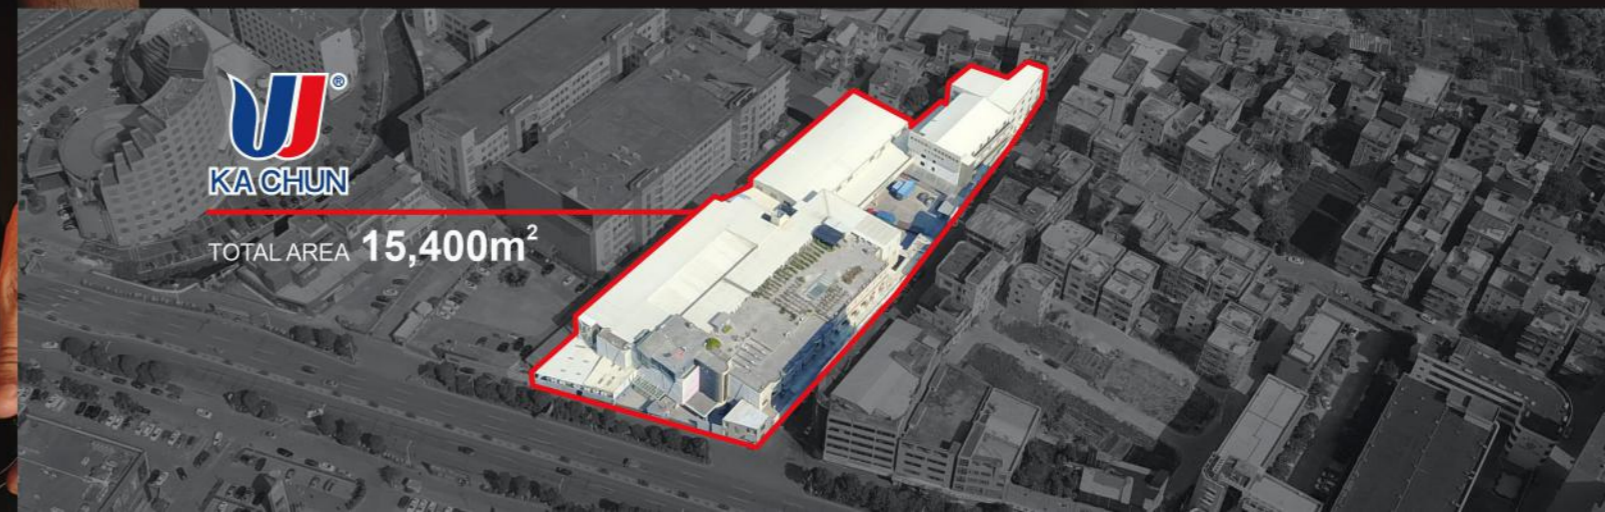

We focus on providing customers with safety products and professional services. While our focus is to ensure our products are safe and functional, we also consider how we can make our products look more fashionable and pleasing to wear.

We sell our products and services domestically and internationally. Our work is guided by key principles and values. These include:

“Create values and extend those values to our customers” “Be a responsible person and employee, and in turn be a responsible company” “Keep customers pleasantly surprised by innovations in our products”
